

## Messaging and Notifications

Design guideline	Code view
------------------	-----------

### Visual Specifications

There are four types of page-level messages: Error, Warning, Success, and Informational.

Messages typically show until the user navigates away from or refreshes the page. If the user is continuing to interact with the form after a successful completion of an action, it may be necessary to have the message disappear after 5 seconds.

Error

Error message goes here. Additional text goes here.
