Radio Buttons

Design guideline

Code view

There are two sizes for radio buttons: small and large. The use of each depends on size constraints on the page.

Radio buttons are used when there is a list of two or more options that are mutually exclusive and the user must select exactly one choice. In other words, clicking a non-selected radio button will deselect whatever other button was previously selected in the list.

Use default browser focus state.

Default

18px

18px

30px

30px

Default is #666666 but it should take the primary financial institution color

30px

30px

Disabled state is 40% transparency

12px

12px

20px

20px

Small

Padding between radio-button and its label will be 10px for XS and 15px for other break points.

Screen size XS

Screen size S, M, L

10px
